

SARBESH ACHARYA

Entry-Level Banking /Finance Data Analyst | MIS & Reporting | Operations Analytics

Bharatpur-15, Chitwan, Nepal | sarbeshacharya45@gmail.com | +977-9842428903 | LinkedIn | GitHub | Portfolio: add link after hosting

PROFESSIONAL SUMMARY

- Final-year BScIT / BSc (Hons) Computing student focused on Banking/Finance Data Analytics, MIS reporting, and operations-focused analysis.
- Strong project-based experience using SQL and Advanced Excel to turn raw banking/customer data into KPIs, dashboards, churn insights, risk segments, and retention recommendations.
- Currently strengthening Advanced Excel, dashboard design, formulas, pivot tables, data cleaning, and business analysis for entry-level analyst roles in Nepal.

TECHNICAL SKILLS

Data Analysis: SQL, Excel, Data Cleaning, Pivot Tables, KPI Analysis, Dashboarding

Excel: Advanced Formulas, Lookup Functions, Conditional Formatting, Charts, Pivot Tables, Dashboard Design

Business Analytics: Banking Churn Analysis, Customer Segmentation, RFM Analysis, CLV at Risk, Revenue at Risk, Risk Scoring

Tools: Microsoft Excel, SQL, GitHub, VS Code

Currently Learning: Advanced Excel, Dashboard Design, Business Analysis

Future Roadmap: Power BI, Python, Financial Data Analysis

FEATURED PROJECTS

Banking Customer Churn Analysis & Retention Strategy | Tools: SQL, Excel | [Project Link](#)

- Analyzed 10,000 banking customer records to identify churn patterns, high-risk customer groups, and retention-priority segments.
- Built SQL-based analysis for churn rate, customer behavior, risk groups, RFM segmentation, CLV at Risk, and Revenue at Risk.
- Designed an Excel dashboard with KPI cards, slicers, pivot tables, charts, and clear business-focused visual storytelling.
- Developed retention recommendations using risk scoring, customer value, churn likelihood, and priority segment logic.

Nepal Banking-Type Excel Data Cleaning Mini Project | Tools: Excel | [Project Link](#)

- Cleaned and standardized raw banking-style customer data using Excel text functions and structured formatting.
- Improved dataset quality by fixing inconsistent entries, formatting issues, and analysis-blocking data problems.
- Prepared clean data for reporting, dashboarding, and further analysis.

Order Intelligence Dashboard | Tools: Excel

- Built an interactive Excel dashboard using lookup formulas, conditional formatting, dynamic outputs, and dashboard logic.
- Created customer and order-level insights using VLOOKUP, Nested IF, COUNTIF, charts, and business reporting views.

EDUCATION

ISMT College Chitwan | BScIT / BSc (Hons) Computing - Final Year | Bharatpur/Chitwan, Nepal

Relevant Coursework: Database Systems, Data Analysis, Information Systems, Software/Computing Fundamentals

CERTIFICATIONS / LEARNING

- Advanced Excel - Currently Learning | SQL for Data Analysis - Project-Based Practice | Power BI - Future Roadmap | Python for Data Analysis - Future Roadmap

ADDITIONAL STRENGTHS

Analytical Thinking | Business Curiosity | Documentation | Problem Solving | Data Storytelling | Banking/Finance Domain Interest | Self-Learning | Building in Public
